## Microsoft Certified IT Professional (MCITP)

The Microsoft Certified IT Professional on Microsoft Windows Vista credential is the premier certification for professionals who implement and administer Microsoft Windows Vista databases. The certification is appropriate for individuals who manage physical database designs, develop logical data models, create physical databases, manage and maintain databases, configure and manage, secure, monitor and optimize databases as well as install and configure Windows Vista.

The MCITP on Windows Vista certification is appropriate for:

- Database administrators.
- Database analysts.
- Database developers.

By earning the premier MCITP on Windows Vista credential, individuals are demonstrating that they have the skills necessary to lead organizations in the successful design, implementation, administration and management of Windows Vista databases.

Microsoft Certified IT Professional (MCITP) on Microsoft Windows Vista candidates need to pass two exams to establish a valid and reliable measure of technical proficiency and expertise in the implementation and administration of Microsoft Windows Vista databases.

Microsoft Certified IT Professional (MCITP) is the premier certification for database server administrators. This certification demonstrates that you can keep up with your enterprise business solutions 24 hours a day.

Training is provided in 2 separate week long modules where you will obtain the confidence required to understand each of these modules through certified trainer supervision, hands on practical labs, classroom lectures and theory debate.

### Course Content & Candidate Profile

Database administrators install or configure Microsoft Windows Vista and manage or maintain databases or multidimensional databases, user accounts, database availability, recovery, and reporting. They also design or implement security or server automation and monitor and troubleshoot Windows Vista activity.

### Examinations:

Each exam provides an MCP (Microsoft Certified Professional) or a MCTS (Microsoft Certified Technology Specialist) certification. Three exams are required to achieve the MCITP:

Module 2: Exam 70-620: MCP: Configuring Windows Vista

Module 3: Exam 70-622: MCP: Supporting and Troubleshooting Applications on Windows Vista

### Formalities and Recognition

Offered/Awarded by: Microsoft <http://www.microsoft.com/learning/mcp/mcftp/dbadmin/default.mspx>

### The Training

The training will be delivered through a combination of professional training and one to one support. Our instructors can provide email support after the course completion.

### Qualifications Gained

When you pass all your exams you will be a MCITP Certified, as well as holding MCP & MCTS Certifications.
