Microsoft Certified Systems Administrator (MCSA)

The Microsoft Certified Systems Administrator (MCSA) certification helps you advance your career by ensuring that you have the skills you need to manage and troubleshoot network environments running on the Windows operating system.

Your pride in passing your exam is just the beginning. The benefits you receive as part of the Microsoft Certified Professional (MCP) community can help you:

- Show off your skills and Microsoft expertise
- Become the office hero or outstanding new hire
- Make connections around the world—two million of them, to be exact

To earn your MCSA on Windows Server 2003 certification, you must pass four exams:

- Two core exams on networking systems
- One core exam on client operating systems
- One elective exam

The MCSA on Windows Server 2003 certification will not expire.

Course Contents

This qualification involves the following MCP and MCTS to make up the MCSA qualification:

Windows XP Professional
Windows 2003 Server
Windows Network Infrastructure – 2003 Server

Examinations

Each MCP/MCTS has one Exam to pass in order to be certified:

70-270 Windows XP Professional
70-290 Windows 2003 Server
70-291 Windows 2003 Network Administration

Formalities and Recognition

Offered/Awarded by: Microsoft
www.microsoft.com

The Training

The training will be delivered through a combination of professional training and one to one support. Instructors will also provide ongoing e-mail support after completion of your course

What qualifications do I gain at the end of the training?

If you pass all your exams you will be MCSA Certified, as well as have 3 MCP's and 1 MCTS in the above subjects
